Experience

January 16, 2023 - Present

Hih7 Webtech Pvt Ltd. Kolkata, West Bengal 700053

Node JS Developer

- As the role Node JS developer on a project, I have successfully built and implemented complex features , ensuring their functionality and quality through testing and debugging.
- Collaborated with cross-functional teams to deliver high-quality software solutions.
- Proficiently utilized MongoDB , Express.js , React.js , and Node.js for seamless application development.
- Applied React.js , React Router Dom for efficient front-end development.
- Utilized Git for version control , ensuring code integrity throughout development process.

Projects

Guardian Banking Solutions

- Developed and contributed to a comprehensive banking application using Node.js, encompassing crucial features such as email sending, authentication, and interactive banking forms.
- Designed and integrated secure authentication mechanisms to safeguard user data and privacy, resulting in a seamless and trustworthy user experience.
- Spearheaded the creation of dynamic banking forms, optimizing the user interface and facilitating efficient data collection and processing.
- Contributed to continuous improvement by staying updated with industry trends and best practices, subsequently integrating new technologies and methodologies into the project.

Doctor Appointment Booking Website

- Created a secure user authentication system using JWT.
- Designed and implemented a responsive front-end with React.js.
- Established a dynamic back-end with Node.js and Express.js.
- Integrated MongoDB for efficient data management.
- Enabled online payments via the Stripe gateway.
